Course Code: 372460168

There are many different causes of dementia. Knowing the symptoms and progression of different dementias supports person centred care for each individual. This module will help you understand why and how an accurate diagnosis is essential for the person living with dementia.

Real life videos capture individual experiences of people living with dementia.

Interactive content and a scenario outline how you can:

- recognise there are different presentations of dementia
- see how dementia impacts the person and their family/carer
- support the person living with dementia to access an accurate diagnosis.

**Improve care. Reduce harm.
Enhance quality of life.**

This module was developed with Health and Social Policy Branch of NSW Ministry of Health.
