

# Understand methoxyflurane for procedural pain management

Methoxyflurane can be administered for procedural pain management, as a quick acting analgesic.

Watch a video demonstration that outlines:

- how to set-up a Pentrox® inhaler with methoxyflurane
- how to guide patients to self-administer methoxyflurane via a Pentrox® inhaler
- the use, dosage and contraindications associated with methoxyflurane
- safety considerations.
